JORDAN DAVIS

Junior Frontend Developer | jordan.davis@example.com | +1 555 010 2048 | github.com/jordandavis

PROFESSIONAL SUMMARY

Computer science student with hands-on experience building responsive web interfaces using HTML, CSS and JavaScript. Created academic projects with DOM manipulation and reusable UI components. Familiar with Git, GitHub and basic REST API integration; interested in frontend engineering and accessible web design.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React (basic), responsive design, DOM manipulation, accessibility
Tools: Git, GitHub, VS Code, Chrome DevTools
Programming: Python (basic), SQL (basic), Java (basic)
Concepts: REST APIs, debugging, reusable components, teamwork, problem solving

PROJECT EXPERIENCE

Personal Portfolio Website | Academic Project

- Built a responsive personal portfolio using HTML, CSS and JavaScript.
- Added project cards, a contact section and responsive navigation.
- Used Git and GitHub for version control and project hosting practice.

Interactive Simon Says Game | Practice Project

- Implemented game logic with JavaScript event listeners and DOM manipulation.
- Practised debugging, conditional logic and responsive CSS styling.

EDUCATION

Bachelor of Technology — Computer Science | 2025–2029
Example Institute of Technology

ADDITIONAL

Languages: English, Hindi | Interests: web development, open-source learning and UI design
